

Introducing the:

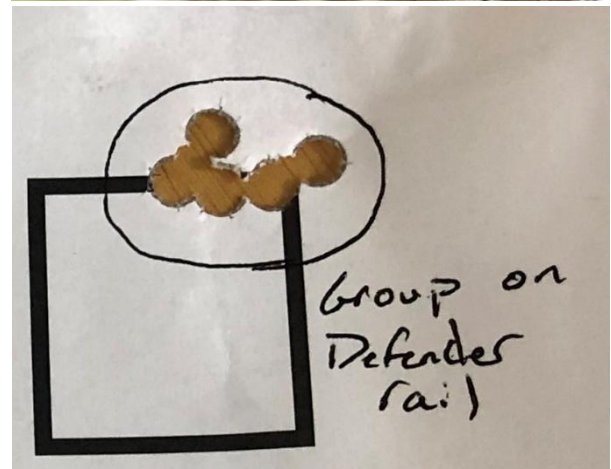

M4 DEFENDER RAIL SYSTEM

US PATENT APPLICATION PUBLICATION No. US-2025-0060190 A1

Achieve Monolithic Performance Without Compromise

Our advanced rail system delivers battle-proven performance and next-generation capability in a rugged, Mission Grade package. Whether you're clearing rooms or engaging long-range targets, this system ensures you stay on target—fast, precise, and mission-ready.

Built for hard hits and harsh conditions, our Defender Advanced Rail System delivers unstoppable performance on a rugged, Mission-Grade platform. Punch through close quarters, lock onto long-range threats, and stay zeroed under pressure.

No shift. No slack. No excuses. Engage faster. Move smarter. Strike with precision.

Designed for Warfighters and Tactical Professionals, this Rail System delivers mission-critical performance in the harshest environments. Engage targets faster. Maintain Zero under fire. Push through the breach and dominate your battlespace.

Built to withstand the demands of real-world operations, it offers battle-proven accuracy, hard-mounted stability, and seamless compatibility with your current kit. Whether you're clearing a building or covering a sector, this is the rail system that won't quit when it counts.

Field Tested, US ARMY, Fort Benning, Ga. March 2025

"In conclusion, I was greatly impressed by Drake Defender Modular Forend Extension and Mounting System. A lot of companies attempted to make this type of system, but failed, so it was a pleasant surprise using the Drake Defender Modular Forend Extension and Mounting System."

"I can say with full confidence that this is an Army-Soldier approved system."

"In a soldier's opinion, this could easily be the most cost-efficient system for the Department of Defense to go with, rather than getting all free-floating barrel hand guards for the M4A1 user."

PERFORMANCE ADVANTAGES

Rapid Target Engagement

25% Proven Accuracy Increase

Maintains Zero for Mounted Lasers, NVDs, and Optics

Precision Return-to-Zero Capability

Triple (3x) Solid locked mounting hardpoints design ensures rock solid lockup with:

No "springboard" effect due to proprietary mounting system

No play. No shift. Zero movement

Withstands Off-Axis Pressure

Fully Compatible with Modern Gunfighting Techniques

MODULARITY & CONTROL

360° Picatinny Rail Coverage

3, 6, 9, and 12 o'clock positions

6.1" of Uninterrupted Rail Space

Ideal for mission-critical gear

Dedicated 45° Offset Front Sight Rail

Precisely positioned for instant sight acquisition

Ambidextrous QD Sling Mounts at 3 and 9 o'clock positions

Bayonet-Compatible Configuration

Supports Existing Issue Rail Covers

Maintains Consistent Handling Temperature

ENGINEERED FOR THE FIGHT

Intuitive Transition for M4/M4A1 Users

MIL-SPEC Type III Hard Coat Anodized Finish

Stainless Steel Self-Locking Fasteners

Proprietary Self-Locking Interface Design

No looseness. No compromise. Absolute reliability.

Stainless Steel Self-Locking Fasteners for extreme durability

Proprietary Self-Locking Interface – No Looseness. No Compromise.
